

Name _____

The Barracuda: A Fish Like No Other

Short Answer Key

1. A barracuda's body is long and torpedo-shaped.
2. A barracuda's teeth are important for catching and cutting up slippery fish.
3. The silver or gray color helps the barracuda blend in with the water and sneak up on prey.
4. Barracudas can grow up to six feet long and usually weigh between 10 and 20 pounds.
5. Their large eyes help them see in dim light, making them effective hunters in low visibility.
