

Name _____

Where Does the Barracuda Live?

Short Answer Key

1. Barracudas live in warm, salty waters of tropical and subtropical seas.
2. Coral reefs provide food and hiding spots for barracudas.
3. Young barracudas often grow and hunt near mangroves and seagrass beds.
4. No, barracudas cannot live in freshwater because they need warm, salty water to survive.
5. Clear water helps barracudas see their prey and hunt effectively.
