

Name _____

The Daily Habits of a Barracuda

Short Answer Key

1. Barracudas are less active at night.
2. Juvenile barracudas stay in schools to stay safe from predators and find food more easily.
3. Barracudas use their excellent eyesight to spot prey even in dim light.
4. Adult barracudas defend their territory to ensure they have enough food.
5. Barracudas help maintain the balance of life in the ocean by hunting smaller fish and keeping populations in check.
