Name _____

The Exquisite Excretory System

Open-Ended Response Questions

1. Explain in your own words why the kidneys are considered the superstar organs of the excretory system.

2. Imagine a scenario where the excretory system malfunctions, and waste products start building up in the bloodstream. How might this affect a person's health? Provide at least two potential consequences.

3. Think about a situation in which the excretory system is not regulating blood pressure correctly. How might this impact a person's overall well-being? What are some potential symptoms or health issues that could arise?

4. The excretory system plays a crucial role in maintaining the body's acid-base balance. Explain what this balance is and why it's important for our health.
