

Name _____

Where Do Bass Call Home?

Open-Ended Response Answer Key

1. Example: Bass need clean water, plenty of food, and places to hide from predators. Without these, they wouldn't survive.
2. Example: If the water is calm and has plants, rocks, or trees, it's likely a good home for bass. You might also see them swimming near the surface.
3. Example: People introduce bass to new places because they are fun to fish for and can survive in different types of freshwater habitats.
4. Example: To protect bass habitats, I would keep the water clean, avoid littering, and encourage others to take care of ponds, lakes, and rivers.
