

Name _____

Big, Bold, and Bassy: All About Bass

Open-Ended Response Answer Key

1. Example: While fishing for bass, I might see the water ripple as the fish pulls on the line. I'd feel the excitement of the fish fighting back as I reel it in.
2. Example: Protecting bass and their habitats is important because they are part of the food chain and help balance nature.
3. Example: Bass are interesting because they are strong, fast, and can grow really big. They also live in many types of water, from lakes to rivers.
4. Example: My new bass would have rainbow-colored stripes and the ability to glow in the dark to attract its prey. It would also be able to jump high out of the water!
