

Name _____

What Do Bears Eat?

Open-Ended Response Answer Key

1. Different habitats provide different foods, so bears have adapted their diets.
2. Bears eat what is available in their environment, like bamboo for pandas or seals for polar bears.
3. (Example response) I would wait by the river and catch fish using my claws, storing fat for winter.
4. (Example response) I would choose to be a panda bear because I like bamboo forests and peaceful environments.
