

Name _____

How Does a Bear Move?

Open-Ended Response Answer Key

1. Different ways of moving help bears survive by allowing them to catch prey, escape danger, and explore.
2. Climbing trees helps bears find fruits and nuts while staying safe from predators.
3. (Example response) I would run fast to catch fish, climb trees to find berries, and swim to cool off.
4. Strong legs help bears run quickly, climb trees, and swim efficiently in their environments.
