## Becoming an Architect: Designing the Future

### Short Answer – Answer Key

1. The purpose of an architectural internship is to gain practical experience and hands-on knowledge in the field of architecture while working under the supervision of experienced architects.
2. The Architect Registration Examination (ARE) is a crucial step in becoming a licensed architect. It assesses a candidate's knowledge in various areas of architecture and is required for obtaining state licensure.
3. Architects contribute to environmental sustainability by incorporating energy-efficient features and environmentally responsible materials into their designs. They aim to reduce the environmental impact of buildings.
4. Effective communication with clients is important because architects need to understand their clients' needs, preferences, and vision for a project. Clear communication helps architects translate client ideas into successful designs.
5. Continuing education is important for architects because it helps them stay updated on industry trends, emerging technologies, and changes in building codes. It ensures that architects provide the best and most up-to-date services to their clients.
