

Name _____

Bee Talk: How Bees Communicate

Short Answer Key

1. The waggle dance shows bees the direction and distance to flowers with nectar and pollen.
2. Bees use pheromones to send messages about danger, food, or the queen's health.
3. The queen bee makes a piping sound to organize the colony during a swarm.
4. Bees use their antennae to share nectar or other information by touching each other.
5. Communication helps bees work as a team to gather food, protect the hive, and stay organized.
