

Name _____

The Amazing World of Bees

Open-Ended Response Answer Key

1. Answers will vary.
2. People can help protect and support bee populations by planting bee-friendly flowers, avoiding the use of pesticides, and providing nesting sites such as bee hotels.
3. Understanding and appreciating the role of bees in pollination helps us recognize their importance in food production and maintaining biodiversity.
4. Challenges bees face include habitat loss, pesticide exposure, and climate change. Addressing these challenges involves conserving natural habitats, reducing pesticide use, and mitigating climate change through sustainable practices.
