## Beetle Life: Daily Habits and Behaviors

### Short Answer Key

1. Being nocturnal means a beetle is active at night and sleeps during the day.
2. Ladybugs and certain ground beetles are active during the day.
3. Dung beetles work together by rolling and burying balls of dung to share as food.
4. Bark beetles burrow into tree trunks to make homes and raise their young.
5. Fireflies flash their lights to attract mates or warn predators.
