## Monkeys' Daily Habits and Behaviors

### Short Answer Key

1. Monkeys are diurnal, meaning they are active during the day and rest at night.
2. Living in a troop helps monkeys protect themselves, find food, and care for their young.
3. Monkeys search for fruits, leaves, seeds, insects, and small animals.
4. Play helps young monkeys practice skills like climbing, problem-solving, and fighting, which they will need as adults.
5. At night, monkeys sleep in safe spots like high branches or sheltered areas to avoid predators.
