## Daily Habits and Behaviors of Otters

### Short Answer Key

1. Crepuscular means being most active during twilight hours—early morning and late evening.
2. Otters groom themselves and keep their fur clean to make it waterproof and maintain its insulation.
3. Sea otters hold hands or wrap themselves in kelp to stay anchored.
4. Different species have different social behaviors based on their environment and survival needs.
5. Otters communicate through sounds like chirps and growls, as well as scent markings.
