

Name _____

The Stunning Looks of Betta Fish

Short Answer Key

1. Betta fish grow to about 2.5-3 inches long.
2. Betta fish can breathe air using their labyrinth organ, unlike most other fish.
3. Betta fish can be red, blue, green, yellow, purple, black, or white, often with patterns like stripes or spots.
4. Their fins are long, flowing, and can take shapes like fans or crowns.
5. The labyrinth organ helps Betta fish survive by allowing them to breathe air from the surface.
