

Name _____

Home Sweet Home: Where Betta Fish Live

Open-Ended Response Answer Key

1. Betta fish can survive in tough conditions because of their labyrinth organ, which lets them breathe air, and their ability to adapt to shallow, warm waters.
2. A Betta fish habitat would include warm water, plenty of plants for hiding, and shallow areas to mimic their natural home.
3. Knowing about their natural habitat helps people create similar environments in aquariums, which keeps Betta fish happy and healthy.
4. The most interesting thing about Betta fish habitats is how they can survive in tiny puddles and low-oxygen water using their special labyrinth organ.
