

Name _____

What's on the Menu for Betta Fish?

Short Answer Key

1. Being a carnivore means Betta fish eat meat, not plants.
2. Wild Betta fish eat insects and mosquito larvae.
3. Betta pellets or flakes provide the nutrients they need to stay healthy.
4. Betta fish use their sharp eyesight to find and catch small prey like insects.
5. Protein helps Betta fish grow and stay strong.
