

Name _____

Danger in the Water: Threats to Betta Fish

Short Answer Key

1. Birds and larger fish are two predators of Betta fish in the wild.
2. Clean water is important because Betta fish need it to breathe and stay safe from diseases.
3. Deforestation destroys the shallow waters and wetlands where Betta fish live.
4. Betta fish stay healthy by living in clean water and hiding among plants to avoid stress.
5. The labyrinth organ helps Betta fish survive by letting them breathe air from the surface.
