

Name _____

Danger in the Water: Threats to Betta Fish

Open-Ended Response Answer Key

1. Protecting the environment helps Betta fish by keeping their habitats clean and safe from pollution or destruction.
2. Betta fish are affected by habitat changes because they need specific conditions, like warm, shallow water, to survive.
3. The most surprising thing is how tiny parasites and diseases, like fin rot, can harm such a strong-looking fish.
4. To protect Betta fish, I would stop pollution in their habitats, create protected areas, and teach people about their importance in the ecosystem.
