## Indonesia's Remarkable Biodiversity

### Short Answer Key

1. One endangered animal species found in Indonesia's rainforests is the Javan rhinoceros.
2. The world's smallest orchid found in Indonesia is the *Dendrophylax lindenii*, also known as the ghost orchid.
3. Indonesia is estimated to have over 1,700 species of birds.
4. Threats to Indonesia's biodiversity include deforestation, illegal logging, habitat destruction, and climate change.
5. Conservation organizations play a crucial role in protecting Indonesia's ecosystems by raising awareness, conducting research, and collaborating with the government and local communities to implement conservation strategies.
