## What Does a Bison Look Like?

### Short Answer Key

1. The hump is made of muscle and helps the bison move its head through snow.
2. A male bison can weigh up to 2,000 pounds.
3. Both males and females have horns that curve slightly upward.
4. The fur is thick, shaggy, and brown, with darker fur around the head.
5. Their legs are strong for running and grazing.
