

Name _____

All About Bison

Open-Ended Response Answer Key

1. Bison help keep grasslands healthy by grazing, which prevents overgrowth and allows other plants to grow.
2. If bison disappeared, the grasslands might become overgrown, and other animals might lose their homes and food sources.
3. People created conservation programs and national parks to protect bison and help their population grow.
4. It is important to protect animals like bison to keep ecosystems balanced and preserve wildlife for future generations.
