

Name _____

What Does a Bumblebee Look Like?

Short Answer Key

1. Bumblebees are usually black and yellow, with some orange or white markings.
2. The head, thorax, and abdomen are the three main parts of a bumblebee's body.
3. The buzzing sound helps shake pollen loose from flowers, making it easier for the bumblebee to collect it.
4. The stripes warn predators that the bumblebee can sting and should be left alone.
5. Most bumblebees are about the size of a large jellybean, ranging from half an inch to one inch long.
