

Name _____

Bumblebees' Busy Days

Short Answer Key

1. Bumblebees spend most of their day collecting nectar and pollen from flowers.
2. A colony usually has between 50 and 500 bumblebees.
3. Male bumblebees, or drones, mate with the queen.
4. Bumblebees work together to gather food, care for young bees, and protect the colony.
5. Bumblebees rest in the evening to recover and avoid cooler temperatures.
