

Name _____

The Incredible Life Cycle of a Bumblebee

Short Answer Key

1. The four stages of a bumblebee's life cycle are egg, larva, pupa, and adult.
2. Worker bees help the queen by gathering food and caring for the larvae.
3. New queens leave the nest and find a safe place to hibernate for the winter.
4. A typical worker bumblebee lives about 2 to 6 weeks.
5. The role of drones is to mate with queens from other colonies.
