

Name _____

The Great Cafeteria Caper

Bertie Farnsworth, a high school sophomore of exceptionally little note, found himself in a most perplexing situation. It was lunchtime at St. Bumblebee's Academy for the Awfully

Ordinary, and Bertie had embarked on a mission that would change the course of cafeteria history forever.

You see, Bertie had grown weary of the culinary offerings at his school. The cafeteria, run by the formidable Mrs. Grimshaw, served up a daily rotation of "mystery meat surprise" and "vegetable medley mystery." It was as if they had taken the concept of mystery to a whole new level. Bertie longed for a bit of excitement in his otherwise humdrum life.

One fateful day, inspiration struck Bertie like a lightning bolt. He decided to embark on a daring culinary adventure right in the heart of St. Bumblebee's cafeteria. With the help of his equally adventurous friends, Jeeves and Madeline, Bertie hatched a plan to introduce a new menu item.

Their scheme involved smuggling exotic ingredients into the cafeteria, right under the nose of Mrs. Grimshaw. Bertie managed to acquire truffles, saffron, and foie gras, which were not only out of place in a school cafeteria but also far beyond the average teenager's palate.

The trio covertly cooked up a gourmet masterpiece—a truffle-infused, saffron-scented foie gras delicacy—and named it "The Bumblebee Surprise." On the appointed day, they smuggled the dish into the cafeteria and placed it discreetly on the serving line.

The moment of reckoning arrived as students began to sample "The Bumblebee Surprise." Gasps of delight and astonishment filled the air. Mrs. Grimshaw herself took a bite and declared it "unmistakably... edible."

News of the culinary sensation spread like wildfire, and soon St. Bumblebee's was the talk of the town. Food critics, celebrities, and even a renowned chef named Gordon Flambé descended upon the cafeteria to savor the legendary dish.

As fame and fortune loomed on the horizon, Bertie and his friends realized that they had accidentally revolutionized school lunches. The cafeteria, once a culinary wasteland, had become a Michelin-starred hotspot.

But as Bertie surveyed the chaos that had ensued, he couldn't help but wonder if they had gone too far. Perhaps, in their quest for excitement, they had disrupted the natural order of the high school cafeteria. Only time would tell if the great cafeteria caper would be remembered as a triumph or a delicious disaster.
