

Name _____

Where Do Camels Live?

Open-Ended Response Answer Key

1. Camels' wide feet, fat-storing humps, long eyelashes, and light fur help them survive in deserts.
2. If camels lived in rainforests, they might need shorter fur and better ways to handle wet weather.
3. Camels help people travel, carry goods, and provide milk in desert areas.
4. Camels would struggle in snowy places without thick fur and proper food sources.
