

Name _____

Wildlife and Biodiversity in Canada

Short Answer Key

1. Beavers build dams to create ponds where they can live safely from predators.
2. Polar bears have thick fur and a layer of fat to keep them warm.
3. Moose are excellent swimmers and can run fast to escape danger.
4. Canadian geese migrate south to find warmer weather.
5. Scientists are protecting polar bears because climate change is melting the ice they need for hunting.
