

Name _____

Wildlife and Biodiversity in Canada

Open-Ended Response Answer Key

1. I would love to see a moose in the wild because they are so big and strong. It would be amazing to see one swimming in a lake!
2. Beaver dams create ponds that provide homes for fish, frogs, and other animals. They also help keep rivers from flooding.
3. If polar bears didn't have sea ice, they wouldn't be able to hunt for seals. This would make it very hard for them to survive.
4. Protecting wildlife is important because animals like the moose, beaver, and polar bear are part of Canada's history and environment. If we don't protect them, they might disappear forever.
