

Name _____

Capturing Creativity

Short Answer Key

1. Photography captures life by freezing moments in time, allowing them to be preserved and revisited.
2. "Moments frozen still" means that through photography, moments are captured and preserved as if they were paused in time.
3. Creative passions might ignite someone's desire to take up photography because they want to express their creativity, share their unique perspective, or capture the beauty they see in the world.
4. An example of a creative passion ignited by photography could be someone discovering a deep love for nature photography after being inspired by the beauty of the outdoors.
5. Capturing moments through photography is significant because it allows people to preserve memories, express themselves creatively, and share their unique perspectives with others.
