

Name _____

A Day in the Life of a Caterpillar

Short Answer Key

1. Most caterpillars are active during the day, but some are active at night.
2. Most caterpillars live alone because they don't need help to find food or survive.
3. A caterpillar eats a lot to grow and store energy for its transformation into a butterfly or moth.
4. Caterpillars avoid being eaten by curling up, hiding, blending in, or scaring predators with bright colors.
5. Tent caterpillars are one species that lives in groups.
