

Name _____

Where Does a Cheetah Live?

Open-Ended Response Answer Key

1. It is important to protect cheetah habitats because losing them would make it harder for cheetahs to hunt and survive.
2. Grasslands help cheetahs survive by providing open space to run and hunt prey.
3. If cheetah habitats continue to shrink, cheetahs could become endangered or even extinct.
4. People can help protect cheetahs by supporting conservation groups and preventing habitat destruction.
