

Name _____

What Does a Cheetah Eat?

Short Answer Key

1. Cheetahs are carnivores because they eat only meat.
2. A cheetah catches its prey by running fast, tripping it, and biting its neck.
3. Cheetahs hunt during the day to avoid larger predators like lions and hyenas.
4. If a cheetah takes too long to eat, scavengers or larger predators might steal its food.
5. Cheetahs commonly hunt gazelles, impalas, and springboks.
