

Name _____

The Life Cycle of a Cheetah

Open-Ended Response Answer Key

1. It is important because hunting skills help cheetahs catch food and survive independently.
2. Cheetahs use their speed to catch fast prey and avoid danger.
3. Female cheetahs focus on raising cubs alone to ensure their safety, while coalitions of males help with hunting and protection.
4. People can help by supporting conservation efforts and protecting habitats.
