

Name _____

All About Cheetahs

Short Answer Key

1. Cheetahs have long legs, a lightweight body, and a flexible spine, which help them run fast.
2. Cheetahs eat meat and catch prey like gazelles and impalas by using their speed and excellent eyesight.
3. Cheetahs need to rest because running fast uses a lot of energy.
4. Mother cheetahs teach their cubs how to hunt and survive in the wild.
5. Cheetahs face dangers from larger predators and humans who take away their habitats.
