

Name _____

Chemical Clues: How Science Helps Solve Crimes

Open-Ended Response Answer Key

1. Forensic scientists help find clues that can catch dangerous people and protect others.
2. They can add chemicals and see if it fizzes or changes color.
3. Reactions can show things our eyes can't see, like hidden substances.
4. Yes, because it would be exciting to solve mysteries using science. (Or: No, I'd rather do something else because...)
