## A Day in the Life of a Chimpanzee

### Open-Ended Response Answer Key

1. Living in groups helps chimpanzees stay safe, find food, and build social bonds.
2. Their habits, like foraging and grooming, help them gather food and strengthen group ties.
3. Answers will vary but may include curiosity about grooming, tool use, or communication.
4. Humans can learn the importance of teamwork, nonverbal communication, and cooperation.
