

Name _____

The Life Cycle of a Chimpanzee

Open-Ended Response Answer Key

1. Young chimpanzees stay close to their mothers for safety and to learn important life skills.
2. Learning from adults helps young chimpanzees gain the skills they need to find food, stay safe, and interact with others.
3. Understanding the life cycle helps us learn how chimpanzees grow, survive, and care for their families.
4. Answers will vary, but may include interest in infant care, social play, or how adults teach young chimpanzees.
