## How Do Chimpanzees Communicate?

### Short Answer Key

1. Chimpanzees use hoots, screams, and grunts to communicate.
2. Grooming helps build trust and strengthen social bonds.
3. A bared-teeth grin often shows fear or submission.
4. Drumming on tree trunks helps them get attention or show dominance.
5. Chimpanzees can hoot while waving their arms to signal excitement or danger.
