

Name _____

All About Chimpanzees

Short Answer Key

1. Chimpanzees are closely related to humans because they share about 98% of the same DNA.
2. Chimpanzees use sticks to catch insects and rocks to crack nuts.
3. They communicate using sounds, facial expressions, and body movements.
4. Baby chimpanzees stay close to their mothers to learn survival skills by copying their actions.
5. Chimpanzees face dangers like deforestation and being hunted by people.
