

Name _____

Chimpanzee Movement: Swing, Climb, and Walk

Short Answer Key

1. Brachiation means swinging from branch to branch using only the arms.
2. Chimpanzees walk using knuckle-walking, balancing on their knuckles.
3. Their strong arms, flexible shoulders, and gripping feet make them good climbers.
4. They use their hands to push branches aside or jump between trees.
5. Their climbing, swinging, and walking skills help them escape predators and find food.
