

Name _____

Chimpanzee Relationships with Other Species

Open-Ended Response Answer Key

1. Mutualism helps species work together for survival and creates a balanced ecosystem.
2. Chimpanzees help keep their environment healthy by spreading seeds and controlling insect populations.
3. The loss of chimpanzees could disrupt seed dispersal and affect plant growth, which would impact other species.
4. Examples may include bees pollinating flowers or cleaner fish helping larger fish by eating parasites.
