

Name _____

City Puzzle: How Urban Planning Shapes Our Cities

Short Answer Key

1. The primary goal is to create functional and attractive city layouts that consider factors like traffic flow, accessibility, and environmental impact.
2. One type of green space is a city park, which is significant in urban planning as it provides residents with recreational and communal spaces, enhancing the quality of life and promoting a sense of community.
3. Modern urban planning can promote environmental sustainability by encouraging energy-efficient buildings, green technologies, recycling, pollution reduction, and conservation of natural resources.
4. Efficient transportation systems reduce traffic congestion, shorten commute times, and make cities more accessible. They benefit residents by improving their mobility and reducing the environmental impact of transportation.
5. Disaster resilience in urban planning involves preparing cities to respond effectively to natural disasters, such as earthquakes or floods, to protect residents and infrastructure. It is important to minimize damage and save lives during emergencies.
