

Name _____

The Hidden Civilization

Short Answer Key

1. Maya's initial reaction was one of excitement and anticipation. She felt a sense of wonder and awe when she first saw the underground chambers of the Middletonian civilization.
2. Maya found a library filled with intricately carved stone tablets. These tablets were significant because they contained the Middletonians' written language, which provided valuable insights into their culture and history.
3. The mystery surrounding the Middletonian civilization's disappearance was that they had vanished without a trace. Maya approached solving it by scouring the texts for clues, seeking expertise from fellow archaeologists, and examining their way of life.
4. Maya's perspective on the Middletonian civilization changed as she made more discoveries. She realized that they had peacefully integrated with neighboring towns and had chosen to leave their underground world. She concluded that they had not vanished but had become part of the surface society.
5. Maya's discoveries had a significant impact on the town of Middleton and the world of archaeology. The underground chambers were transformed into a museum, allowing people to explore the history of the Middletonians, and her findings enriched the field of archaeology.
