

Name _____

Thirsty World: The Global Challenge of Access to Clean Water

Short Answer Key

1. Possible answer: Fatigue and time-consuming, preventing engagement in other activities or education.
2. Possible answer: Investing in infrastructure like water treatment facilities and pipelines ensures a consistent supply of clean water, reducing the reliance on unsafe sources.
3. Possible answers: Implement water conservation measures, develop water recycling systems, and adopt sustainable water management practices.
4. Possible answer: Organizations often help communities by drilling boreholes, installing hand pumps, and providing training on maintenance and water quality monitoring.
5. Possible answer: Educational programs can teach people about proper water treatment and hygiene practices, reducing the risk of waterborne diseases.
