

Name _____

Exploring North Carolina's Diverse Climate

Short Answer Key

1. In the Piedmont region of North Carolina, summers are warm with temperatures ranging from the mid-80s to low 90s Fahrenheit. Winters are cooler, with temperatures often in the 30s and 40s Fahrenheit.
2. North Carolina's mountain region experiences cooler and less humid summers compared to the coastal and Piedmont regions. Summers in the mountains have average temperatures ranging from the upper 60s to low 80s Fahrenheit.
3. North Carolina's diverse climate allows for a wide range of outdoor activities throughout the year. Residents and visitors can enjoy hiking, swimming, skiing, and exploring forests and parks depending on the season.
4. North Carolina's fall season is special because of the vibrant and picturesque fall foliage. Many people visit the state during this time to witness the beautiful colors of the changing leaves.
5. In the coastal region of North Carolina, winters are characterized by mild temperatures with no snowfall. In contrast, the mountain region experiences colder temperatures and frequent snowfall during the winter months.
