

Name _____

Where Do Clownfish Call Home?

Short Answer Key

1. Clownfish are found in the warm, shallow waters of the Indian and Pacific Oceans, near places like Australia, India, and Southeast Asia.
2. Clownfish live in tropical coral reefs, specifically among the tentacles of sea anemones.
3. Clownfish don't get stung because of a special slimy layer on their skin that protects them.
4. Clownfish protect sea anemones from predators, while sea anemones provide clownfish with a safe place to live.
5. Clownfish eat tiny sea creatures like plankton and shrimp.
