

Name _____

What's on the Menu for a Clownfish?

Short Answer Key

1. Being omnivores means clownfish eat both plants and animals.
2. Clownfish eat plankton, algae, shrimp, and tiny crustaceans.
3. Clownfish eat leftover food from the sea anemone's meals.
4. Staying near the sea anemone keeps clownfish safe and provides easy access to food.
5. Algae is a plant that clownfish nibble on when it grows near their home.
