

Name _____

A Day in the Life of a Clownfish

Open-Ended Response Answer Key

1. (Example response) Living in groups helps clownfish stay safe because they can work together to protect their home and clean the sea anemone.
2. The clownfish protects the sea anemone by keeping it clean and chasing away predators, while the sea anemone keeps the clownfish safe with its stinging tentacles.
3. (Example response) If I were a clownfish, I would enjoy swimming through the tentacles of the sea anemone and knowing it was keeping me safe.
4. The clownfish's bravery helps it survive by scaring off predators that might try to eat it or attack its home.
