

Name _____

The Daily Life of a Cockroach

Open-Ended Response Answer Key

1. Being nocturnal helps cockroaches avoid predators and humans, making it safer to search for food and water.
2. Students may answer: "It's interesting that cockroaches use pheromones to warn others about danger or find food."
3. A scientist might study how cockroach groups choose hiding spots or how they share food.
4. Cockroaches are resourceful because they can climb, hide, store energy, and communicate with each other to survive in difficult environments.
